Canker

Heavy fruit load with lots of blind buds and poor leaf development may have been a result of early spring leaf bud death – but how do we manage the plant now?

07/20/2012 12:14

All Fruit, No leaves (or very few, and/or very small...)

Complete Crop Loss due to Cold Damage.

Killed flower buds

A Few Fruit in The Tops of the Bushes Only

Carpenter bee damage

?

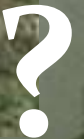

Blueberry Scorch Virus

Soil test: pH = 5.2, OM = 8%; Ca = 1,842 lb/A; P, K, Mg in medium to high ranges; Al = 498 lb/A

Foliar analysis: N,P, K in range or slightly low; micros also; Manganese excessive...1,180 ppm

?

Upland Cranberry Frost Protection

Blackberry Psyllid Damage on Chester Blackberry

Primocane raspberries had lots of problems with stunting. Nutrient tests did not reveal anything unusual and this phenomenon repeated itself throughout the region.
